## DIGITAL STORYTELLING WORKSHOP

### What is Digital Storytelling?

The practice of combining narrative with digital content, including images, sound and video to create a short movie. Digital stories can be instructional, persuasive, historical, or reflective.

### Why is it significant?

The LTBB Education Department invites you to experience a digital storytelling workshop where people tell stories to share beliefs and values to others. The oral tradition of knowledge transfer and exchange has served as the basis for education since humans began teaching one another and digital stories build on this model by incorporating rich, dynamic media.

"This project was made possible in part by the Institute of Museum and Library Services Grant # NG-03-16-0030-16"
