This program is funded by the US Department of Education's NACTEP Grant

Medical Assistant Program

The Medical Assistant program offers classroom instruction and hands-on practice.

Graduates will be prepared for immediate employment in physician's offices and health clinics.

Students are eligible to take the registered medical assistant (RMA) Certificate examination offered by American Medical Technologists.

Program Highlights

Medical Assistant training provides diverse employment opportunities. Special emphasis is placed on skills needed to work in physician offices and health clinics.

Students will also gain valuable knowledge in communication skills.

This is simply a highlight of what Medical Assistance training offers students to better prepare them for the certificate offered by American Medical Technologists. For more information, please contact us!

This certificate is offered through North Central Michigan College in partnership with the Waganakising Odawa Career and Technical Education Program.
